Introduction

I'm a full-stack developer with a background in videogame design. I've been working with **Cibernova**, a business that develops AI RAG systems with a particular emphasis on **marketing and customer service**. My expertise spans across various technologies and frameworks, allowing me to contribute effectively to complex software projects.

Experience

Software Developer   *Valencia, Spain (Remote)*
Cibernova   *Jan 2024 – Present*

- Developed a SaaS providing virtual employees to clients using Next.js, AWS, and microservice platforms like n8n, Google Cloud, and Azure.
- Built AI assistants in WhatsApp, Facebook and WWW.
- Implemented and optimized RAG (Retrieval-Augmented Generation) systems for enhanced AI performance.
- Fine-tuned AI models for specific business needs, improving accuracy and relevance of responses.
- Created customized n8n workflows for small businesses, automating processes and integrating various tools.
- Developed WordPress solutions tailored for smaller businesses, enhancing their online presence.
